

Washington-Greenville Greenway

The Vision:

A multi-use trail for walkers, hikers, cyclists and equestrians, connecting the two cities.

The Washington-Greenville Greenway will:

- Offer access to nature for all
- Help promote healthy lifestyles
- Be an outdoor classroom for students
- Extend existing trails
- Conserve our natural resources
- Showcase the extensive heritage of Washington, Greenville, and Pitt and Beaufort Counties

Our Mission

It is the mission of the *Washington-Greenville Greenway Committee* to work with citizens, potential user groups, state and regional and locally elected officials, and the staffs of the City of Washington, the City of Greenville and Counties Pitt and Beaufort to identify and aid in establishing this multi-use trail. The greenway trail is to serve as an Active Transportation Corridor connecting downtown Greenville, East Carolina University’s North Campus Crossing, the Washington waterfront, Cypress Landing and neighborhoods and communities along the way. Users will be able to hike, bike, or ride horses (restricted area) away from vehicular traffic, and enjoy the scenic beauty and historic and natural features of the area.

Route

Phase 1 of the trail, in Washington, will run along the abandoned Atlantic Coastline Railroad corridor from West 3rd Street to Plymouth Road. Phase 2 will follow the power line easement west from there until it intersects the railroad corridor again just west of Tranter’s Creek Drive. Future phases will extend west to Greenville, and south to Cypress Landing. In Greenville a new greenway trail alignment will connect North Campus Crossing with uptown.

Supporting the Trail and the Vision

Successfully built rail-trails in North Carolina have received help from the state, counties and municipalities, but it is critical for all to have local citizens’ leadership from folks like yourself.

You can support the trail in many ways:

- *Come to meetings* and learn about the trail!
- *Talk to friends and neighbors* to encourage them to get involved.
- *Contact your elected officials* and tell them of your interest in having trails in your community.
- Other valuable services include *donating easements, money or in-kind services; making phone calls; and as the trail develops, by help with trail construction and maintenance.*

The cities of Washington and Greenville are committed to working with Beaufort and Pitt Counties to make this Greenway Trail a reality. Please add **your** support. Thank You!
